

Letter of Recommendation for Doug Buchanan

TO: Lake Norman State Park

I'm honored to recommend Doug Buchanan for your project.

I've worked with Doug over the last year as he designed specifications for a 25,000 square foot metal roof for our aviation hangar including structural modification necessary for the new roof. Doug was involved in the project during the design, the construction and post construction. The entire process went smoothly. The drawings were well thought out, complete and detailed. There were no change orders at the end of the job.

Doug provided support to the contractor to keep the project moving forward and there were no delays during the job. Doug was the key team member that helped the project flow smoothly. He communicated well with the contractors, inspectors and my staff to exceed our expectations on the project. During this project we have become friends and I am confident with going to Doug with engineering and design questions. He would be the first one I would call on any future projects.

Doug Buchanan has my unqualified professional endorsement and my deep personal respect. Please feel free to call at any time if I can be of further assistance.

Sincerely,

Allan Courtright
